

NCTX Aerial Robotics Showcase

Event Date: February 27, 2020

Location: Wilkerson-Greines Activity Center

Hosted by: Fort Worth ISD

Birdville ISD was invited to participate in the North Central Texas Aerial Robotics Showcase along with 12 other surrounding districts hosted by Fort ISD. Over 200 BISD students attended the event. BISD robotics student, Tyler Payton, coached Phil Beckman, BISD's Partner in Education Manager, in the "Superintendent's Challenge." Team members Anthony Cooper, Freddy Serrato, Gillian Kotera, Jordan Ensminger, Alexandra Serrato and Justin Shelly went head-to-head with Southwest High School in an exhibition match to demonstrate the drone competition. They performed well and completed the event in half the time of the other school's team. Additional BISD team members Kevin Dockery, Austin Dick, Sullivan Wall and Cory Mercado worked the display table and fielded questions from students, educators, administrators and industry business partners. Teacher, Dana Harris, is very proud of how all of the students worked together to make the event a great success!
